A JUMP INTO THE FUTURE

WebCatalog

Web Interactive Electronic Catalog

WebCatalog is the Internet browser of LITESTAR 4D interactive electronic catalog. It allows dynamical and extremely fast product searches at 3 different levels (technical, architectural and commercial) and data-sheets management into more than 20 languages. WebCatalog includes the option to visualize the product documents (assembly instructions, drawings, certificates etc.) and is configurable to be visualized directly at the distributors' Websites, including the e-commerce feature. WebCatalog is only OxyTech.

OxyTech

WebCatalog

Manufacturers' Web Catalog

The WebCatalog allows manufacturers to publish their product data on the Web in a dynamic way.

- Product search at 3 different levels (technical, commercial and esthetic), one level is also dynamically configurable.
- Drag & Drop selected product data directly into LITESTAR's Litecalc, Liswin and Photoview modules; the lighting design, interactive catalog and photometric data management modules of LITESTAR 4D.
- Standard or customized versions available
- Configurable for direct visualization on the manufacturer's Website.
- Directly accessible by retailers, distributors, public bodies and designers.
- Available in more than 20 languages.

Web Interactive Electronic Catalog

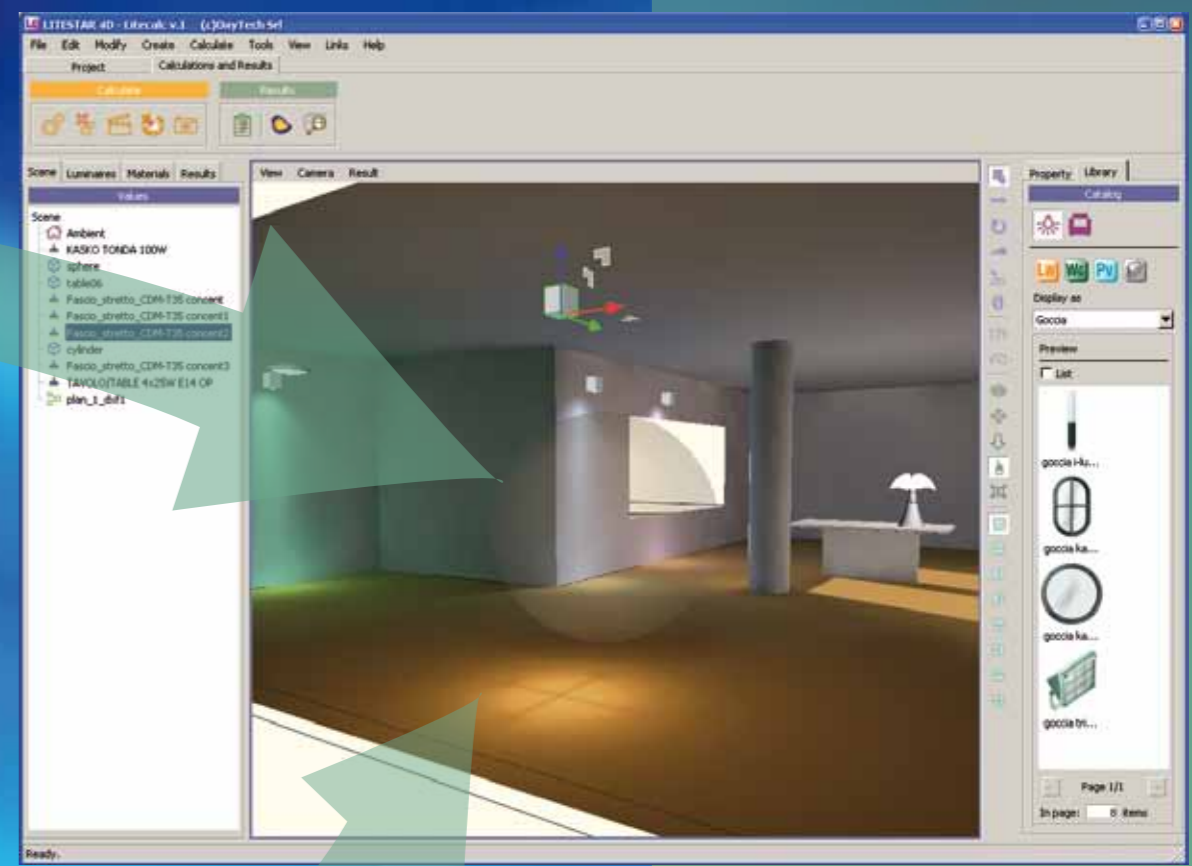

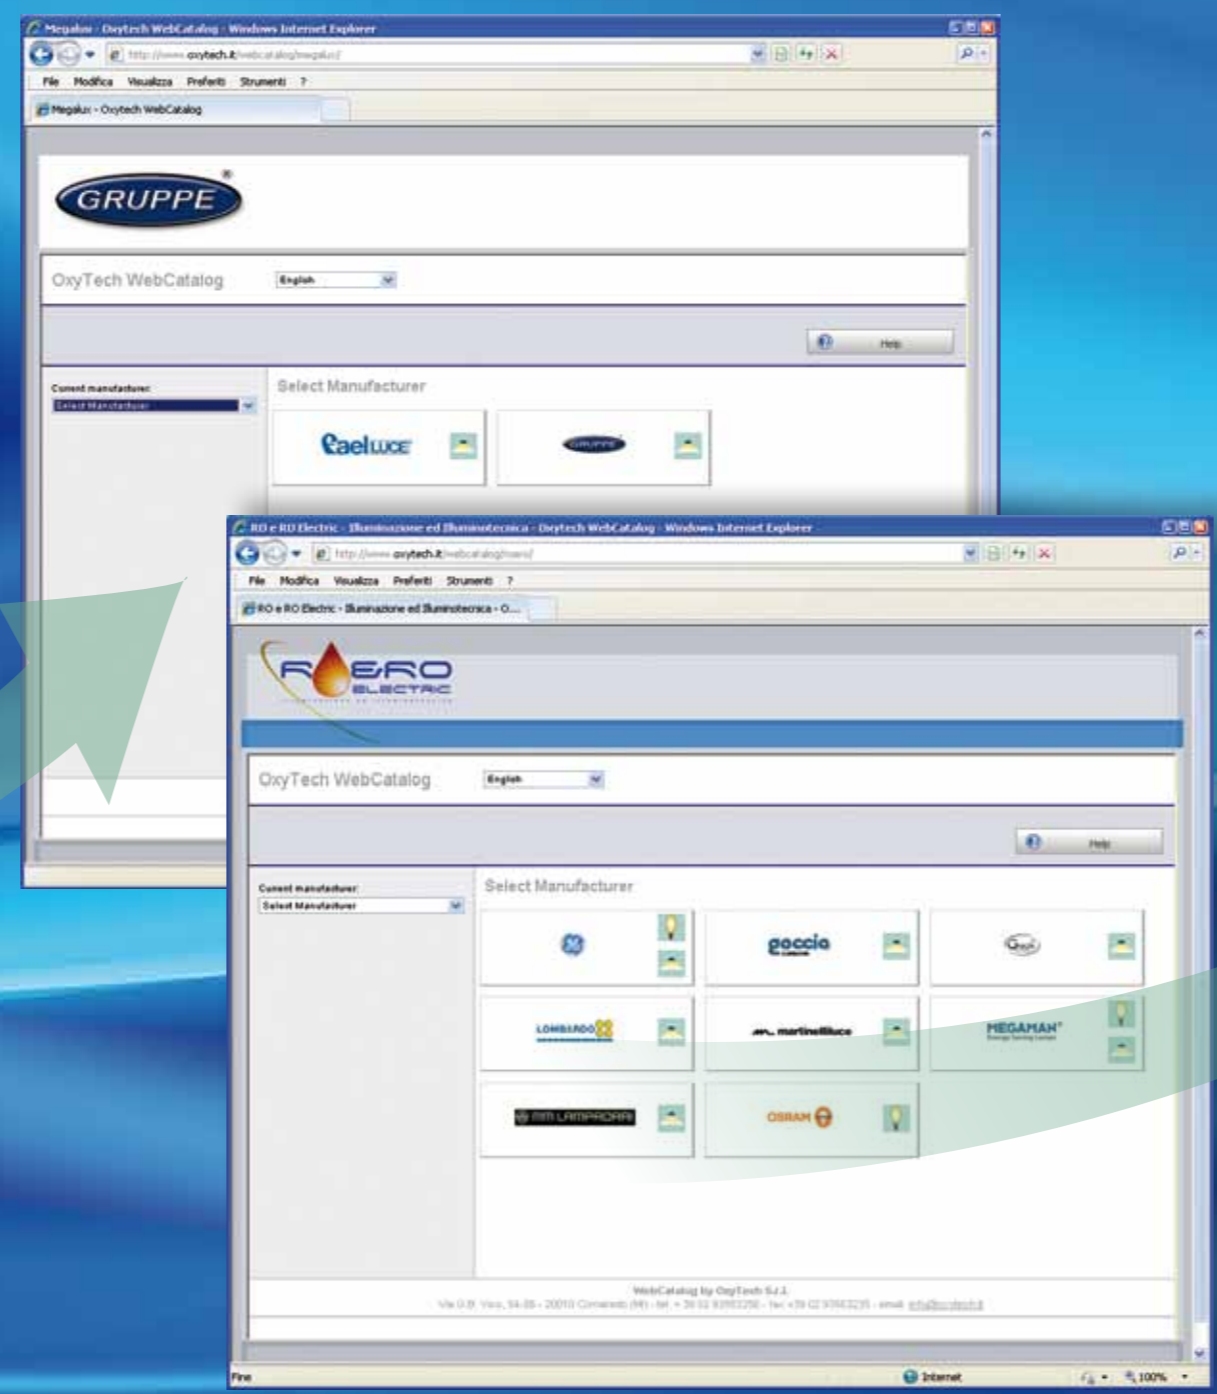

WebCatalog D1

Distributors' Web Catalog

WebCatalog D1 allows distributors to publish their own catalog of manufacturer product data directly from the manufacturer's Website.

- Allows visualization of manufacturers' products data of interest at the distributor's Website using filtering capability that only shows products carried by the distributor.
- Creates a subset of product information directly downloadable from the manufacturers' Web Catalog; an efficient way to save time searching for only those products sold by the distributor.
- Manage e-commerce easily by just adding prices.
- Distribute customized versions of LITESTAR directly to customers through the distributor's Website.

LITESTAR 4D

Designers - Public Bodies

Designers and public bodies get information through manufacturer's or distributor's WebCatalogs downloading all available information with just a mouse click.

Make your life dynamic.
